PROFILE

Passionate and energetic front-end developer with a particular passion for client-focused development using the latest technologies to build extraordinary creations.

EXPERIENCES

Frontend Instructor Appleseeds Academy

IN 2019-2020

Instructing bootcamps about frontend development using React and JS.

Mentor&Frontend Developer IsraelTechChallenge (ITC)

IN 2017-2018

- Mentoring startups in the disciplines of technology and user experience.
- Helping students to focus their attention, understand their technological needs and hack product growth.
- Taught how to handle problems and create magical things using the latest technologies (HTML5, CSS, SCSS, React, Javascript, Bootstrap).

UI Developer BuzzHunter

IN 2017-2018

During my time at Buzzhunter, my main focus was collaborating with designers in order to apply mockups based design and development with the React javascript library but used a variety of technologies for the client-side(JQuery, vue.js and more). The development methodology was very agile with an almost daily release of features and produced with an in-house mechanism of build and deployment.

EDUCATIONS

BACHELOR OF TECHNOLOGY

RMIT University

Studied Computer and Information Systems Security at RMIT University.

Personal Projects

Flusha, Final Study Project

Acted as UI Developer then as UX Planner
